Arkansas Engineering Emerging Leaders Program is a six session program that features curriculum focusing on right-brain thinking – the people skills associated with business management and the creative, visionary skills required of effective leaders. Prominent, accomplished presenters will provide personal insights, timely information and useful tools that will enable participants to expand their leadership skills and contributions to the advancement of their engineering career, their employer, the engineering industry and the quality of life in Arkansas. Graduates will be well-rounded professional and community leaders who are not only capable technical professionals, but who also effectively and comfortably exhibit the people skills that separate them from the majority.

Who Should Participate: The **Arkansas Engineering Emerging Leaders Program** is open to anyone over 25 who is a member of ASPE and/or an employee of an ACEC/A member firm. Participants should be interested in and willing to participate in class discussions and should be interested in promoting the image of their profession, community involvement and in business and/or community leadership. Participants should have the support of their employer and supervisor and are expected to attend all class sessions. The **Arkansas Engineering Emerging Leaders Program** is limited to 10 participants.

How to Register: Each participant should complete the registration packet and return it to the Executive Offices no later than **FRIDAY, OCTOBER 23rd**. Please note program space is limited and applications will be confirmed on a first come, first served basis.

Cost: The program cost is \$925 and includes all speakers, classroom instruction, materials and lodging for the January 6-7th and February 10-11th sessions. Registration to the ACECA Agency Update is also included. Registration information can be found at www.arkansasengineers.org or by calling 501-541-5229.

Alumni Program: As an added benefit, graduates of the **Arkansas Engineering Emerging Leaders Program** may attend any prior year's class sessions and earn pdh's for that session, at no additional charge.

At this time, all sessions are scheduled for "in-person" instruction. If for safety purposes social distancing is necessary, we reserve the right to change the program format to virtual.

"The opportunity to meet with the heads of the state's top engineering firms in the three-hour Senior Leaders Roundtable is by itself worth the price of the course." – Rick Geraci, P.E., FACEC

"The program will hone and develop leadership skills for use in the participant's career, business and other professional and social organizations." – Barry McCormick, P.E., 2010-2011 ACEC/A President

"Emerging Leaders is a great way to equip and encourage the future leaders of our industry. The sessions provided tools to improve team performance and foster personal and professional growth in many of the skills traditionally lacking within our industry. I'm glad I got to be a part of Class II. – Steven Beam, 2011 Emerging Leaders graduate & 2020-2021 ACECA President
